Natural Wood Care

Our natural wood

Our natural wood flooring is designed to deliver lasting performance with minimal maintenance. With the right care, it will retain its natural beauty, warmth and durability for years to come.

Simple Steps for Lasting Performance

Sweep or vacuum regularly

Remove dust and dirt frequently to prevent particles from scratching the surface or becoming embedded in the wood.

Protect high-traffic areas

Use mats or rugs in entrances and busy areas to reduce wear and protect against scuffs and scratches.

Use protective pads on furniture

Attach protective pads to the underside of furniture legs to help prevent scratches and surface wear.

Use the right cleaner

Use a specialist wood flooring cleaner rather than standard household products to maintain the finish and longevity of your floor.

Clean spills immediately

Wipe up any spills or moisture as soon as possible to prevent staining or damage to the wood.

For optimal care, we recommend our WOCA Clean and Care Kit.

TOP TIPS

Act quickly

The sooner spills are treated, the easier it is to prevent damage.

Avoid excess moisture

Do not use excessive water or steam cleaning, as this can damage the wood and affect its stability.

Use the right tools

Clean using a soft brush, dry mop or microfibre cloth to protect the surface.

Protect high-traffic areas

Use mats or rugs to minimise wear and prevent dents or scratches.

Lift, don't drag

Always lift furniture to avoid damaging the floor.
